Professional Summary

Results-driven AI Engineer and full-stack engineer with hands-on production experience building agentic AI systems, LLM-powered automation pipelines, and cloud-native healthcare solutions. Skilled in designing multi-agent architectures and vector-based retrieval systems. Seeking to bring deep expertise in LLM integration and data-driven automation to a forward-thinking healthcare organization.

Experience

AI Associate Consultant, Emids 2026–Present

- Developed enterprise-grade AI solutions for healthcare using Google ADK, FastAPI, LiteLLM, MCP, GraphRAG, VectorRAG, and Azure cloud services.
- Design multi-agent AI systems for Prior Authorization, Claim Denial Management, Medicare Plan Builder, Quote-to-Card enrollment, Healthcare Ontology, and intelligent knowledge platforms, automating complex payer workflows.
- Build scalable RAG and GraphRAG platforms with Neo4j, pgvector, PostgreSQL, and OpenAI-compatible LLM Gateways, enabling semantic search, knowledge graph reasoning, and citation-based AI responses.
- Develop production-ready full-stack applications using React, TypeScript, FastAPI, and cloud-native architectures while integrating enterprise healthcare data pipelines and AI-driven automation.

Associate AI Software Engineering Intern, Emids 2025–2026

- Designed enterprise-grade agentic AI systems using Google ADK, MCP tools, Meta Prompting, FastAPI, and Azure, reducing manual healthcare claim processing time by approximately 60%.
- Automated end-to-end healthcare workflows including claim denial analysis, Medicare plan building, and EDI 834/837 processing using multi-agent orchestration and LLM-driven pipelines.
- Built full-stack web portals using React and FastAPI to streamline healthcare operations and improve workflow efficiency.

Technical Skills

AI & Analytics: Google ADK, LangChain, LiteLLM, RAG, GraphRAG, FAISS, MCP Server, Prompt Engineering
Programming: Python, Java, JavaScript, C
Backend: FastAPI, Spring Boot, Django, Node.js, Flask
Frontend: React.js, Tailwind CSS, JSP

Cloud & DevOps: Azure, AWS, Docker
Databases: MongoDB, PostgreSQL, SQLite, MySQL

Education

B.Tech in Computer Science and Engineering

Koneru Lakshmaiah University 2022–2026
CGPA: 9.89/10

Class 12 — Sri Chaitanya Junior College 2020–2022
Percentage: 96%

Class 10 — ST. ANN'S School 2020
Percentage: 95%

Projects

Prior Authorization Automation 2026

Python, Google ADK, LiteLLM, FastAPI, React, TypeScript
A healthcare automation tool to insurance approval workflows — analyzing patient documents, validating payer requirements, and generating formatted medical documentation, reducing manual work from hours to minutes.

Healthcare Workflow Ontology 2026

Python, Neo4j, PostgreSQL (pgvector), Google ADK, FastAPI

Built a Healthcare Workflow Ontology system that extracts structured knowledge graphs from PDFs, transcripts, and text documents using a multi-agent AI pipeline, stores them in Neo4j and pgvector, and enables hybrid GraphRAG + VectorRAG search for clinical workflow queries.

Healthcare Knowledge Platform 2026

FastAPI, Streamlit, Azure PostgreSQL, pgvector, LLM Gateway

Built a Retrieval-Augmented Generation document store using FastAPI, Streamlit, Azure PostgreSQL, pgvector, and an OpenAI-compatible LLM Gateway. Implemented document ingestion, chunking, multi-model embeddings, hybrid vector/full-text search, multimodal PDF image retrieval, and AI-generated answers with citations.

Quote To Card – Insurance Enrollment Platform 2026

Python, Google ADK, LiteLLM, FastAPI, React, TypeScript
End-to-end AI enrollment system covering quote generation, member onboarding via document extraction, EDI 834 filing, and automated ID card creation — compressing a multi-day process to minutes.

ClaimDenial – Automated Claim Management System 2025

Google ADK, FastAPI, React, MongoDB
Agentic system for denial analysis, appeal generation, and real-time claim tracking — reducing manual load by 60%.

Product Plan Benefit Builder (Medicare) **2025**
Google ADK, FastAPI, LiteLLM, Azure
Automated Medicare plan design, benefits configuration, and member enrollment using multi-agent AI workflows.

Certifications

Claude Certified Architect - Foundations	Certification
Servicenow Certified Application Developer	Certification
AWS Cloud Practitioner	Certification
Azure Fundamentals (AZ-900)	Credential
RedHat Certified Developer	Certificate
Salesforce AI Associate	Achievement
